Place the four corner bases (1) at the corners of a square measuring 3x3 m.

If the marquee is mounted outside, use ground pegs (8) inserted into the ground with a hammer.

If the marquee is mounted on a concrete or wooden floor, the corner base can be fastened with concrete nails or screws.

Ensure that you fasten only one corner until the entire frame has been assembled in order to ensure that the other corner bases are placed correctly within the square.

Place the longest tubes (2) in the two outermost holes in each corner base and the shorter tube (4) in the middle hole. Mount the tubes so the snap-and-click features point upwards.

Mount the tubes (2) in (3) for a complete arch. Mount the connector (5) with the middle tube (4). Mount the horizontal tubes (3) with the connectors (5) to make a ring.

Assemble and mount the top section consisting of (6) and (7).

Now you can fasten the remaining corner bases if necessary.

Finally, mount to cover onto the frame. Fasten the four straps at the ends of the cover to the four corner bases.
