DANCOVER[®]

Safety Advice

Attention

In some countries approval is needed to set up a tent larger than 75 m².

The owner of the tent has the sole responsibility to make sure that these local rules are followed and that the mounting is correct.

In case of bad weather conditions, it is your responsibility to ensure that people inside are safe and that the tent does not cause damage to others.

Do not use open fire, welding equipment or other ignition sources in the tent. Though the fabric is made of flame retardant material it can still burn.

It is always recommended that you secure your tent properly with safety straps and augers when you put up the structure.

We recommend you to insure the tent, or check if it is covered by home contents insurance, in case of unplanned events, accidents or bad weather.

Tents are meant as temporary shelter and must be evacuated under extreme weather conditions.

This structure is not tested for specific snow and wind loads. That's why we always recommend to remove snow from the top.

I

Select a flat ground for the tent, unpack the carton and check that all the parts including tubes, tent and accessories... etc. are present as same as list. Assemble the framework of rooftop by joining the portion (6.7.8.9.10.11.) together with poles (2.3). Ensure the screw fixed to every pole tightly

7x7m-2.3 PARTY TENT SEMI PRO

II

Attach one end of supported pole (4.5) to the joints (7.8) ,Strengthen the frame by using screws and turnbuckle set (17 .) .Long screws are used on all connection between 50mm and 54mm pipe .Short screw are used on connection between 42mm and 38mm pipes .

III

Cover the roof on the frame and attach it with the bungee balls. Take care of the tension of the bungee balls, if you use too many on one side of the tent, it may be too tight to tie the other side. Leg 1 with holes, should be on both sides of the tent.

IV

Attach all 8 supported poles (1) to the joints (6.9), built-up the framework use the super pegs to fix the poles into the ground. Tighten the frame with the turnbuckle set (16).

V

Spread the wall panel and door panel. Attach it to the framework by using the bungee balls clasping the frame to grommets over the wall panel and door panel to ensure stability. Use the short pegs to fix the doors to the ground. Connect leg cover with sidewall and endwall by velcro as shown.

VI

Clasp the guy lines to each corner of the tent. Fix the other end of the line to the ground with pegs.

Warning

1. In order to avoid rust on the pipes, oil is covered on the surface. Before you set up the tent, please remove the oil carefully to keep the cover clean.
 2. Take note that the tent needs to be handled carefully to avoid damage.
 3. Do not force the frame as it may be damaged in the process.
 4. Tents are meant as temporary shelter and must be evacuated under extreme weather conditions.
- Please select a suitable site for the tent to avoid damage to underground sprinkler systems, water, gas or electrical lines
