PARTY TENT SEMI PRO

5m series

# DANCOVER<sup>®</sup>

## Safety Advice

### Attention

In some countries approval is needed to set up a tent larger than 75 m<sup>2</sup>.

The owner of the tent has the sole responsibility to make sure that these local rules are followed and that the mounting is correct.

In case of bad weather conditions, it is your responsibility to ensure that people inside are safe and that the tent does not cause damage to others.

Do not use open fire, welding equipment or other ignition sources in the tent. Though the fabric is made of flame retardant material it can still burn.

It is always recommended that you secure your tent properly with safety straps and augers when you put up the structure.

We recommend you to insure the tent, or check if it is covered by home contents insurance, in case of unplanned events, accidents or bad weather.

Tents are meant as temporary shelter and must be evacuated under extreme weather conditions.

This structure is not tested for specific snow and wind loads. That's why we always recommend to remove snow from the top.

## 5m-2.3 PARTY TENT SEMI PRO

I

Select a flat surface for the tent. Unpack the boxes and check if all listed parts are included. Assemble the roof frame by mounting parts 9-13 on the pipes ( Parts 2,3,4,5 ) Use the screws to firmly attach the parts

## 5m -2.3 PARTY TENT SEMI PRO

II

Lift one side of the tent frame and attach the legs(1). Attach the legs with part no. 8 to the outside in all four corners. Place the roof onto the frame and use the bungees to fasten it. Be sure not to put too much tension on the bungees in order not to make attaching the other side more difficult.

III

Attach the legs on the other side and install the feet(16,17,18,19) at the bottom. Use the long ground pegs to fasten the feet to the ground. Attach the side covers to the pipes(1,8). Connect leg cover with sidewall and endwall by velcro as shown. Reinforce the side frame by attaching the diagonal pipes(6) to all four corners. Complete the bottom frame with the required pipes (2,7) and connector (16,17,18,19).

## 5m-2.3 PARTY TENT SEMI PRO

### IV

Extend the sidewalls and the endwalls and attach the sidewalls to the frame using the bungees. Attach the endwall directly to the roof using the short bungees. Use the short ground pegs to fasten the end walls to the ground. The guy rope runs from every corner of the tent and is braced to the ground using the screw hooks. The professional ground pegs provide the tent with additional tension and stability.

### Warning

1. In order to avoid being rusted by air, oil is covered on the surface of the pipes, before set up the tent, please remove the oil carefully to keep the cover clean.
  2. Take note that the tent needs to be handled carefully to avoid damage.
  3. Do not force the frame as they may be damaged in the process.
  4. Tents are meant as temporary shelter and must be evacuated under extreme weather conditions.
- Please select a suitable site for the tent to avoid the damage to underground sprinkler systems, water, gas or electrical lines.
